

REAL SOLUTIONS

for regenerative pig farming

Hog Hut™ Farrowing House

Outdoor farrowing has never been safer or more efficient than with Osborne's new Hog Hut farrowing house. Portable and long-lasting, with built-in fork slots for easy moving and automated cleaning, Hog Hut is the modern alternative to old fashioned farrowing huts.

Features & Benefits

- Fully insulated, R-7.5 corrosion-resistant fiberglass-reinforced structural panels with generous 48 ft² internal space.
- Insulated and easy-clean non-porous floor panels for winter protection.
- Hinged floor for summer ground cooling and automated dumping of bedding and waste.
- Separated internal creep area with hinged roof for easy overhead access.

Big Wheel® Finishing Feeders

Outdoor growers around the country rely on Osborne's signature mechanical-flow Big Wheel Feeders to improve feed to gain ratios while virtually eliminating feed waste. Big Wheel Feeders are available with a number of options to customize each unit for your application. When it comes to feeding pigs the natural way, *nothing* beats a Big Wheel Feeder.

Features & Benefits

- Provide fresh feed only when pigs need it – automatically and on demand – for maximum intake.
- Patented delivery system ensures feed goes in the pig – not on the ground – for improved feed conversion.
- 360° access to feed and more standing room means less wasteful competition.
- Perfect for hoop barns, dirt lots, and pastures.
