

# OSBORNE®

## Electronic Identification

Osborne's selection of RFID tags contains a passive, full duplex (FDX-B) RFID transponder encoded with a 15-digit identification number that can be read by ISO compliant readers, including Osborne antennas and ID Loggers™. Tags can be used with either a standard large rectangular male pin (for sows) or a small round male pin (for pigs), and are applied with the Pro Grip™ Universal Tag Application Tool.
