

TEAM®

TOTAL ELECTRONIC ANIMAL MANAGEMENT

The Osborne TEAM® Electronic Sow Feeding (ESF) System is one of the most reliable and proven ESF systems in the world. The TEAM system assists in the total reproductive management of gestating and farrowing sows and unbred gilts.

The system utilizes RFID technology and a rock-solid feeding station to feed sows their exact nutritional requirements in a non-aggressive and competition-free environment.

Let Osborne's experience in electronic sow feeding help you increase your sows' parities with TEAM's reliable and automated data collection.

◆ LOCAL SERVICE & SUPPORT

TEAM is developed, manufactured and serviced right here in the U.S.A. Only Osborne has a department solely dedicated to servicing and supporting its automated equipment customers. Osborne is always available with prompt and courteous support of your system throughout its lifetime.

◆ FLEXIBLE PEN LAYOUTS

The TEAM System is flexible enough for any herd size and works well in either a static or dynamic system. Simply chose the layout that best fits your needs, and we can tailor our equipment to your specifications. Use the reverse side to make a rough sketch of the layout and contact your Osborne Sales Representative for a free review and consultation.

◆ NUTRITION FLEXIBILITY

Successfully plan for your sows' future by matching exact nutrition requirements with optional dual feed hoppers, allowing you to feed two separate rations in the same feeding cycle. Good nutrition is crucial to sow longevity and providing the right nutrients can add healthy parities to her useful life.

◆ SOFTWARE COMPATIBILITY

TEAM Software is compatible with leading sow management software applications and data is easily exported. Maintain animal data and records in one software application without double entry.

◆ SIMPLE, RUGGED DESIGN

At an incredible 970 pounds of hot-dipped galvanized steel, the Osborne TEAM G-Station™ (Gestation Station) is the strongest and most rugged sow feeding station commercially available! Some of our long-time customers confirm the stations longevity with many years of uninterrupted service. TEAM offers easy access to animals with large doors, simple features, and only a few moving parts.

If your genetics provider trusts our equipment to select boars,

why not trust us to care for your sows?

MAXIMIZE YOUR SOWS' GENETIC POTENTIAL

You probably know the Osborne FIRE® (Feed Intake Recording Equipment) performance testing system is the choice of nearly all major swine genetics companies. They trust Osborne equipment to successfully identify top performing boars that help improve the genetics on your farm.

So why not trust Osborne's TEAM® Electronic Sow Feeding system to help care for your sows?

Decades of research and development have been invested in TEAM, making it North America's premiere electronic sow feeding system. Let us help you use your records to increase your sow parities and maximize her genetic potential.
