

FIBERGLASS WEATHER HOODS/ELBOWS

AGRI-AIDE Elbows or Weather Hoods have been specifically designed to be used as either a weather hood or a pit-fan transition. They readily adapt to Osborne Slant-Wall or Panel exhaust fans.

The elbow is smooth (inside and outside), non-porous and made of white RTM-Glas™ fiberglass-reinforced plastic. There is absolutely nothing to corrode and nowhere for dust to accumulate.

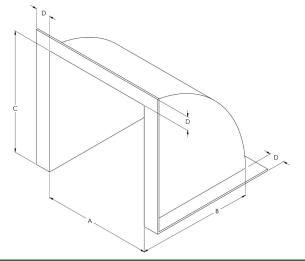

As tough in cold weather as in hot. The elbow does not become brittle in the cold like other plastics, and it holds its shape in the heat, thus it will not heat-sag like other

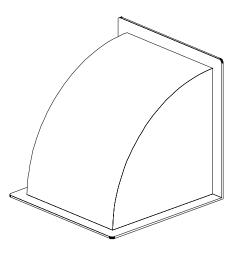

Adapting to many fans—not just Osborne fans—the elbow replaces many metal hoods and pit transitions for years of trouble-free service.

FIBERGLASS WEATHER HOOD/ELBOW SPECIFICATIONS						
Catalog Number	Rough-in Dimensions in mm				Shipping Weight	
	А	В	С	D	lbs	kg
FV-00FE12	16 406	16.875 429	18 457	2 51	15	6.8
FV-00FE16	20.875 530	21.75 552	23 584	2.125 54	19	8.6
FV-00FE20	25.5 648	26.5 673	27.25 692	1.75 44	25	11.3
