

# REAL SOLUTIONS

for today's hoop barn finishing

## WEIGHT WATCHER™

The Original Automatic Sorting System

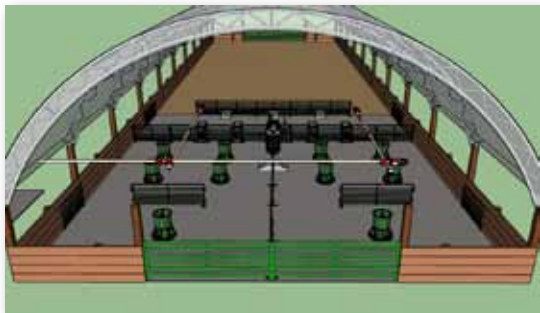

**Quickly sort animals for market while minimizing losses and improving barn turnaround.**

Perfect for large pens in hoop barns, Osborne's Weight Watcher System and ACCU-ARM® Survey Scale™ allow producers to quickly sort animals for market, minimizing losses and improving barn turnaround.

With Weight Watcher, you can:

- Market more pounds of pork by controlling animal growth and reducing time to market.
- Automatically sort pigs in large pens for market with uniform loads and easy loadouts.
- Match your packer's matrix to cut market sort loss and stop selling overweight pigs.
- Use the DailyWeigh™ Software and exclusive Market Predictor™ to estimate group time to market.

Weight Watcher, the *original*, advanced automatic sorting system, is more than just an auto-sort scale. Weight Watcher is a growth management system and is your tool for feeding pigs based on their actual weight, allowing you to produce more uniform loads for your packer.

# WEIGHT WATCHER™

The Original Automatic Sorting System

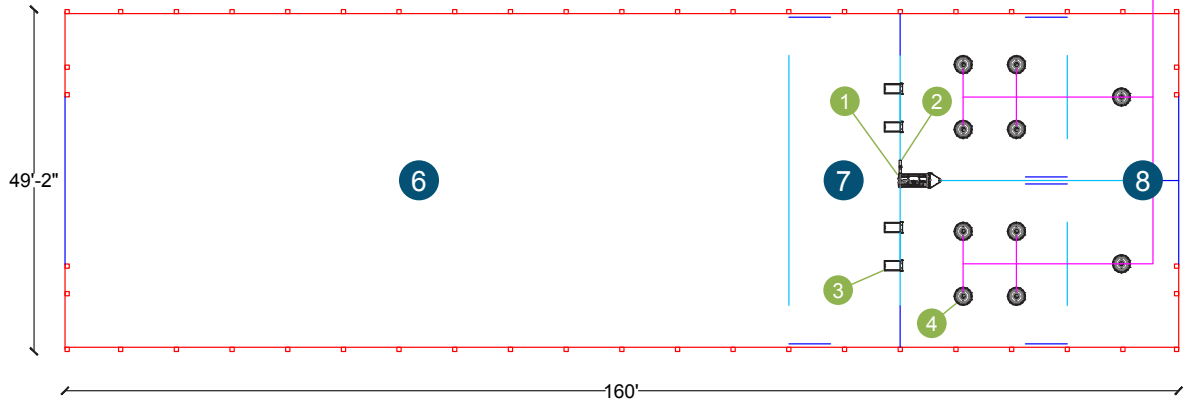

## Example Hoop Barn Layout 1

14 ft<sup>2</sup> per animal for 500-head

1	Osborne Survey Scale™
2	By-Pass Gate
3	One-Way Gate
4	RF2 Big Wheel Feeder
5	Feed Bins

6	Bedding / Loafing Area
7	Watering Area
8	Feeding Area

## FAST, EASY STARTING. WASTE-FREE FINISHING.

with **FAST Start™**

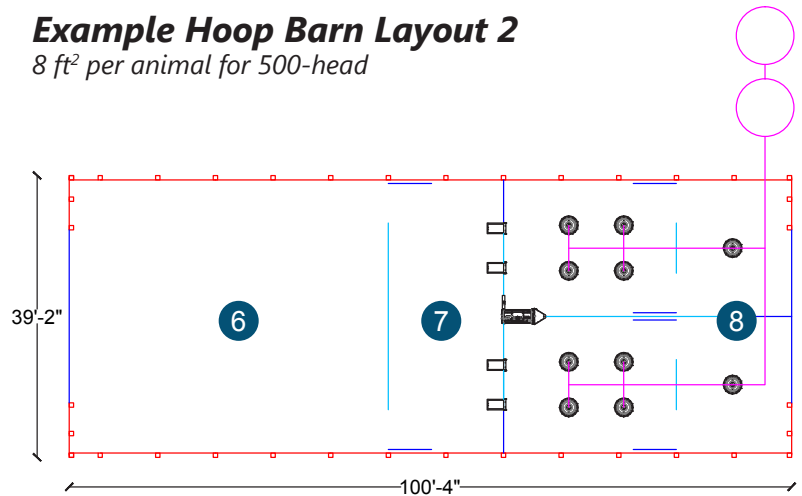

Use Osborne's new FAST Start wean-to-finish feeder in the feeding area to provide fast, easy starting of weaned pigs and efficient, waste-free finishing for market animals. FAST Start's unique and automatic *gravity-to-mechanical* feed delivery system improves feed conversion, because more feed is used for actual animal growth and not wasted. More standing room at the round trough means less feeding stress, better consumption, and less wasteful competition. Tested and approved by numerous independent producers, FAST Start brings efficient, waste-free pig feeding to your traditional production.

## Example Hoop Barn Layout 2

8 ft<sup>2</sup> per animal for 500-head

**The Weight Watcher System design is flexible enough to accommodate a variety of requirements to match your specific growing standards or marketing plan.**

Multiple program requirements can easily be met with any Weight Watcher System designed for hoop barn production. Weight Watcher allows you to capture the highest market premiums and reduce sorting labor and errors without sacrificing pig care.

Let Weight Watcher bring automatic sorting technology to your traditional hoop barn production.
